

Explanation of graph:

The Vertical axis of the graph indicates the average LENT scores and the Horizontal axis refers to the timeline for each group of patients.

The GREEN line indicates {4} patients that underwent only Arm B (placebo) treatments. Their initial average LENT score was around 12.5 and After undergoing Arm B, their LENT score remained the same.

The RED line indicates {24} patients that crossed over from Arm B to Arm A. Their initial average LENT score was 10.2, After Arm B - 9.8, After Arm A - 5.8 and At 1-year f/u, it remained constant at 5.8.

The BLUE line indicates {3} patients that crossed over from Arm A to Arm B. Their initial average LENT score was 8, After Arm A - 1.9, After Arm B - 5.9 and At 1-year f/u, it remained constant at 5.9.

The BLACK line indicates {27} patients that underwent only Arm A (HBO) treatments. Their initial average LENT score was around 11.8, After Arm A - 6.3 and At 1-year f/u, it dropped further to 4.2.
